Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so manual testing is also encouraged.

ARIA
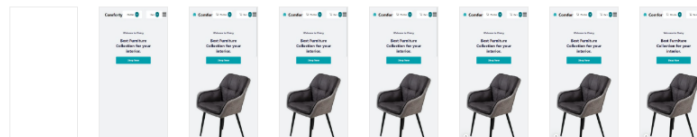

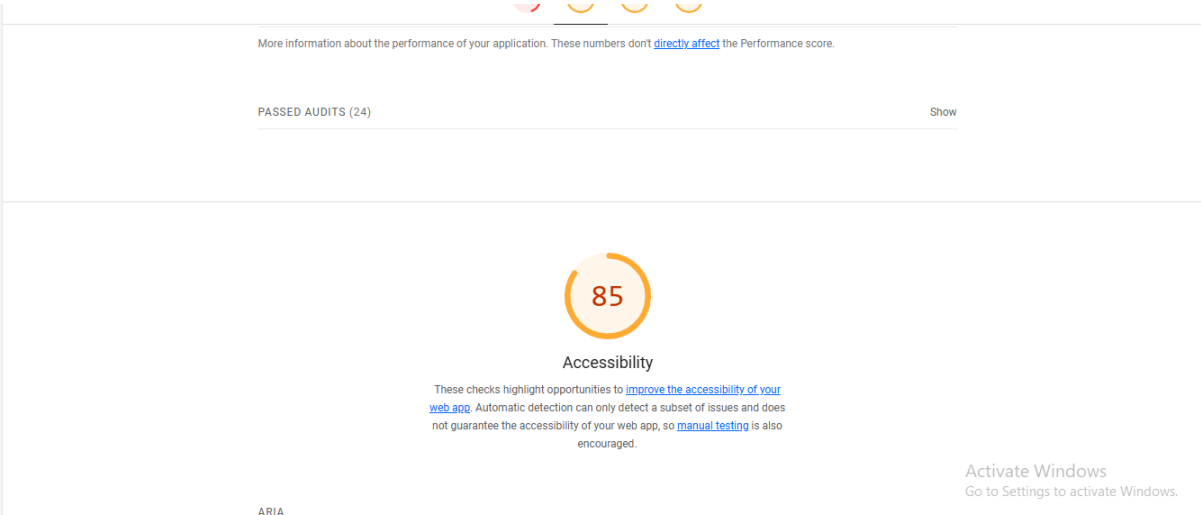

Test Case ID	Description	Test Steps	Expected Result	Actual Result
TC001	Validate product listing page	Open product page > Verify product display	Products are displayed correctly	Products displayed correctly
TC002	Test API error handling	Disconnect API > Refresh page	Fallback UI with error message is displayed	Error message shown
TC003	Check cart functionality	Add product to cart > Verify cart contents	Cart updates with added product	Cart updates as expected
TC004	Ensure responsiveness on mobile	Resize browser window > Check layout	Layout adjusts properly to screen size	Responsive layout working as intended
TC005	Validate search functionality	Enter query in search bar > Verify results displayed	Relevant products appear in search results	Relevant products displayed as expected
TC006	Test "Remove from Cart" functionality	Add product to cart > Remove product > Verify cart contents	Cart updates correctly after product removal	Product removed successfully
TC007	Validate category filter functionality	Select category > Verify product list updates	Product list updates based on selected category	Product list updates correctly
TC008	Test checkout process	Add product to cart > Proceed to checkout > Submit order	Order placed successfully	Order placed as expected
TC009	Test product details page	Click on product > Verify details page loads	Product details page displays accurate info	Product details displayed correctly
TC010	Ensure compatibility on different browsers	Open app in Chrome, Firefox, Safari > Verify functionality	Functionality remains consistent	Consistent across tested browsers
